Welcome Producers,

On behalf of 2J Angus we want to say Thank You for looking into this 2024 Angus bull offering.

It is great times in the cattle industry, and we feel if there is a time to take an older herd bull or cow and replace them now is as good as time as ever.

We continue to keep the very best genetics and breed these new progenies to help improve your herd. Growth, Easy Calving, Replacement Females, The Phenotype, and Docility all in one herd bull is what we strive to continue.

To all our past customers, Thank You for your continued support! As we welcome new customers, we say Thank You for giving our bulls a chance to change your herd! Our bulls will work for you, and we stand behind them! We enjoy hearing feedback from the offspring doing well in your operation!

The bulls are all semen checked and have been on an easy roughage ration, they will be ready to go to work for you.

*Sincerely,
2J Angus
Chris, Lanna
CeJay, Dakota, and Dawson Jones*

- This Bull has quite a story! We gave Dawson his pick of the 2021 replacement heifer pen to start his herd and he picked an excellent female out of our top cow family at 2J. 316 dam, 2J Blackcap 156, is backed by Blackcap 734 and great grandam Blackcap 26U3, who have been the most productive and beautiful cows in our herd. On 156 top side is 2J Madge 210, another matriarch cow that has raised offspring that we either put on the bull sale or have kept as a replacement every year. Last winter on Valentines Day, 156 layed down and had her first calf, and boy was it a good one. 2J Tuff N Uff 316 jumped right up nursed his dams perfect udder and has been a standout bull calf ever since. He featured everything we want to see in a calf and still does. He is wide based, good footed, thick muscled, with lots of hair for an Angus calf, and 110% docility. His beautiful first calf dam raised him right along with other heifers and cows without any added attention. If you look at his dams pedigree she ranks in the top 30% or higher in most of her numbers in the Angus breed, she has a perfect udder, phenotype, genetics, and docility. We feel this bull will make a big impact in the beef business! He would compliment any Angus herd, show cattle herd, cows or heifers, you can use him any way you want! He will keep moderate birth, good structure, hair, growth, pheonotype, and docility. This was completely Dawson's decision to put him on the bull sale as the rest of us wanted to retain him in the herd.

• Selling ½ one half semen interest and full possession of this bull.
